

# Environmental policy

Francesco Toffoli S.p.A., in carrying out its activities, considers environmental protection an inescapable duty, an ongoing effort and a constant component of its mission.

Through this document and with the awareness of the scope of the law, the Management intends to define and communicate to the entire staff the objectives to be pursued to ensuring the best possible conditions of both the environment and the territory.

The company, which has its own environmental protection guidelines, actively participates in the prevention and continuous improvement program through the adoption of an effective Environmental Management System in accordance with UNI EN ISO 14001: 2004. In this light, it reaffirms the commitment of the whole organization to:

- **maintaining** compliance, in substance and principles, with all applicable laws and regulations on environment and health and safety at work and other commitments and agreements signed by the organization;
- systematically **identifying** and monitoring the direct and indirect aspects and their environmental impacts arising from activities, products and services within its competence on which it can exert influence;
- **assessing** environmental aspects as a result of changes resulting from new activities, new processes, to changes in the applicable legislation or changes in the territory within which the company operates;
- **pursueing** the continuous improvement of its environmental performance by defining targets, indicators and environmental programs, including health and safety at work, to ensuring the proper implementation of the principles of this policy and the adopted strategies.
- **preventing** possible forms of pollution and climate change in line with European policies
- **raising awareness**, involving, consulting, training and empowering the entire staff in order to enable them to carry out their duties while respecting the environment
- **developing** the sustainability process with particular attention to the energy-environment aspects
- **managing** suppliers by promoting "environmentally sustainable" organizations and products
- **obtaining** A.U.A. in order to improve the management of the aspects contained therein
- **pursueing** the integration with the quality system in order to optimize resources by raising their performance

This policy is shared with all employees and disseminated to stakeholders through the usual forms of communication.
